

NEWSFLASH

This coming Monday 12 August

We start with a general session on any problems you may have whatever they are! On any, Microsoft, Android or Apple device you have with you or at home

Come along for a chat, a coffee and get things sorted

We will also have a session on;-

Backing up your data from a computer or laptop

Why do you need to backup all your data? If you don't and your computer crashes or data is compromised by a virus you could lose everything you have on the computer; documents, pictures, videos in fact all your family data. This would be a disaster. Also if your computer is nearly full you can save files and folders to a backup drive

We will show you how and where you can save all your data so it can be used and retrieved at a later date

When: 1.00 pm Monday 12th August

Where: Arohanui Church Rooms 81 Middle Road Havelock North
