

Weekly Programme Reminder

To SeniorNet and U3A members

This coming Monday 17 June we will show a SeniorHangout entitled

“Major New Technologies & Change”

followed by a discussion on one of these new technologies

Food - Precision Fermentation

Traditional Fermentation v Precision Fermentation

What’s the difference? Find out this coming Monday

This **interesting SeniorHangout** was shown some months ago but is **worth another viewing** as a recent **HB Today article** featured the **progress** being made by **Precision Fermentation** in New Zealand.

This is a **fascinating insight** into what is happening **now on a global basis** and **highlights the part New Zealand is playing** in this new technology.

If you have any views on this subject please come along and join in the conversation. This is happening right now under our collective noses!

Venue: Arohanui Church, 81 Middle Road, Havelock North

Date: Monday 17 June 2024

Time: 1.00pm to assist with your tech problems and 1.30pm for the start of this SeniorHangout.
